PROFESSIONAL SUMMARY

Software Engineer and Computer Science student with hands-on experience building fullstack web applications, RESTful APIs, and AI-integrated products. Proficient in React, Node.js, TypeScript, and relational databases (PostgreSQL/SQL). Trilingual in Spanish (Native), English (C1), and German (B1). Experienced in building scalable SaaS tools, responsive interfaces, and automated workflows.

PROJECTS

Zumi - Household Expense & Shared Finance SaaS (PWA)

- Architected and developed a progressive web application (PWA) for budget management and shared household expense tracking.
- Implemented relational database schemas using Supabase (PostgreSQL) for real-time transaction tracking and multi-currency balance calculations.
- Built clean, accessible frontend interfaces with React and Tailwind CSS, optimizing state management and user workflows.

Smart Kitchen - AI-Powered Food Inventory & Recipe Generator

- Designed a fullstack web app to track household food inventory, monitor item expiration dates, and minimize food waste.
- Integrated LLM APIs (Google Gemini) to dynamically generate tailored recipes based on expiring pantry ingredients.
- Built automated notifications and data persistence for inventory management using Node.js and SQL.

PROFESSIONAL EXPERIENCE

Quality XP Development | Junior Software Developer

San José, Costa Rica | Jun 2024 – Jul 2024

- Collaborated in designing and building responsive web applications using JavaScript, HTML, and CSS.
- Improved UI responsiveness and resolved cross-device compatibility bugs to optimize overall user experience.
- Documented technical processes and system architectures to streamline onboarding for new team members.

Villa Garita Restaurant | Customer Service Agent

Alajuela, Costa Rica | Sep 2023 – Feb 2024

- Managed high-volume customer communications and provided technical support under strict SLA metrics.
- Collected and structured customer feedback data to suggest operational improvements for support procedures.

EDUCATION & CERTIFICATIONS

- Bachelor's Degree in Software Development Engineering | Universidad Fidélitas (In progress)
- Oracle Cloud Infrastructure (OCI) 2025 Certified Foundations Associate | Oracle
- Oracle Next Education (ONE) – BackEnd Development & Tech Explorer | Alura / Oracle
- Google Gemini AI Immersion & ChatGPT Applications | Alura / Google

TECHNICAL SKILLS

- Languages & Frameworks: JavaScript, TypeScript, React, Next.js, Node.js, Express, TailwindCSS, Java (Spring Boot), Python, SQL, NoSQL
- Databases & Cloud: PostgreSQL, Supabase, MySQL, Oracle Cloud (OCI), RESTful APIs, Git, Vercel
- Languages: English (C1 Professional), Spanish (Native), German (B1 Intermediate)
